

FIG. 1

FIG. 2 is a block diagram of a system 200. The system 200 includes a processor 201, a memory 202, a network interface 211, and a communication module 220. The processor 201 and memory 202 are connected to the network interface 211. The network interface 211 is connected to the communication module 220. The communication module 220 is connected to a server 231 and a server 232. The server 231 is connected to a database 241, and the server 232 is connected to a database 242. The database 241 is connected to a user interface 251, and the database 242 is connected to a user interface 252.
